BEFORE YOU GO...

- Before using the water trails, check tide charts at saltwatertides.com. It is best to plan your trip around high tide (i.e., one hour before to one hour after). For your safety, stick to marked water trails.
- Flying insects can be problematic, especially from early May to early August. Bug repellent and/or protective clothing is recommended during this period.

- Please take everything you bring into the preserve with you when you leave.
